365 TOTAL PROTECTION

365 Total Protection Business & Enterprise

Description

 Email Live Tracking	Monitoring of all email traffic in real-time and definition of filtering and delivery options
 Infomail Handling	Prevention of direct delivery of emails classified as newsletters and info mails
 Content Control	Protection against the intrusion or sending of unauthorized file attachments according to company policy
 Compliance Filter	Extended filter for automatic checking of email traffic according to self-defined filter rules
 Spam and Malware Protection	Multi-level filtering systems and in-depth analysis for immediate detection and defense against new types of threats and attacks
 Outlook Deny & Allow listing	Interface for central control from Outlook
 Individual User Signatures	Central control over company-wide uniform email signatures; automatic matching of contact data records through integration of Active Directory
 1-Click Intelligent Ads	Setup of automatically integrated advertising banners or links in the email signature for external corporate communication; group-based assignment possible
 Company Disclaimer	Automatic integration of uniform and legally compliant company disclaimers in every outgoing email; group-based assignment possible
 Global S/MIME & PGP Encryption	Strong encryption solution to secure email communication against unauthorized modification or access by third parties; protection of internal company and sensitive contents against spying
 Secure Cipher Policy Control	Central TrustChain management; individual definition of security criteria used for email communication
 Websafe	Securing confidential email communication with communication partners who do not use encryption technology
 Single Sign On	Secure and simple authentication with Single Sign On within Microsoft. All users with a valid license of Microsoft 365 can easily authenticate with their user data in Vade's product, without having to maintain additional separate login data.

365 Total Protection Enterprise

Description

 Email Archiving	Automated, legally compliant and audit-proof email archiving immediately upon receipt and dispatch of emails
 10-Year Email Retention	Simple and legally compliant access to archive data within the framework of legal retention periods
 eDiscovery	Advanced email full-text search with numerous filter functions for precise location of searched data in seconds
 Forensic Analyses	Forensic analysis mechanisms, algorithms and AI-based detection mechanisms for effective defense against sophisticated threats
 Secure Links	Secure Links protects users from malicious links in emails. It replaces original links with a rewritten version that goes through Vade's secure web gateway. The click on a link initiates a deep web scan that scans the target site for malicious web resources.
 ATP Sandboxing	Protection against targeted and blended attacks through dynamic analyses
 URL Malware Control	Securing of all Internet calls from email communication; analysis and securing of downloads
 QR Code Analyzer	Protects from malicious QR codes embedded in images. Detects QR codes at light speed and can analyze different types, including URLs and texts.
 Realtime Threat Report	Overview of the Company Security Management; collection of comprehensive information (threat reporting, attempted attacks including attack type and vector) at a glance
 Malware Ex Post Alert	Notification of emails subsequently classified as harmful including detailed evaluation
 Email Continuity Service	Effective protection against system failures with automatic immediate activation
 Malware Ex Post Deletion	If emails that have already been delivered are identified as potentially malicious in the course of lower-level AI-based analyses, Ex Post Deletion enables authorized security officers and administrators to initiate an immediate protective measure.

365 TOTAL PROTECTION

365 Total Protection Enterprise Backup

Description

-  Automated backups for mailboxes, Teams, OneDrive and SharePoint
 Comprehensive protection against data loss for Microsoft 365 user and group mailboxes (incl. emails, calendars, contacts), Teams chats (incl. individual and group chats as well as all files shared via Teams) and OneDrive and SharePoint document libraries.
-  Recovery of mailboxes, Teams Chats, OneDrive, SharePoint
 Multiple full and granular file and email recovery capabilities: Advanced search functionality lets you select individual files for recovery for OneDrive accounts, SharePoints, and endpoints.
-  Windows-based endpoint backup and recovery
 All files and folders from a chosen Windows workstation or laptop can be restored to the original machine or to an endpoint management server.
-  Backup account activity audit
 Review a range of actions, such as users enabling or disabling mailboxes, Teams, OneDrive and SharePoint backups; data browsing activity; and restore requests.

365 Total Protection Compliance & Awareness

Description

-  Permission Management
 Effortlessly manage Microsoft 365 permissions, get full visibility, enforce compliance policies, and monitor violations with our 365 Permission Manager, an easy-to-use GRC (Governance, Risk, and Compliance)/DLP (Data Loss Prevention) service.
-  Security Awareness Service
 Security Awareness Service trains your employees using realistic spear phishing simulations and AI-powered e-training, heightening awareness of cyber security risks and threats. Fully automatic and easy to use.
-  AI Recipient Validation
 AI Recipient Validation analyses emails based on your previous communications and prevents security breaches and loss of sensitive data.
